

High School

Name: _____

Date: _____

Point of View

Directions: Working in pairs, you'll each take turns interviewing each other by taking the 3-2-1 Challenge. First, find three new facts about your partner. Next, find 2 areas in which you have similarities. This can be a shared belief or the number of siblings you both have. Then, find one thing that you don't agree on, such as Maya's favorite food is pizza, but I hate pizza. Take the time to understand your partner's point of view because you'll then have to explain it to the class!

Partner #1 name:

3 new facts:

2 areas in which you have similarities

1 thing that you don't agree on

Partner #2 name:

3 new facts:

2 areas in which you have similarities

1 thing that you don't agree on
