

Emozi® – Teacher Coaching Overview

Coaching is a core support in the Emozi evaluation. It is designed to help teachers deliver lessons effectively, integrate skills into daily routines, and address classroom-specific needs. Coaching is not an evaluation of teacher performance; it is a partnership to support student success.

What to Expect:

- Monthly coaching visits during the implementation period (Oct–Feb).
- Each visit includes observation of part or all of a lesson, feedback discussion, and review of lesson/fidelity logs.
- Focus on strengths, practical solutions, and tailored strategies for your students.

Your Role:

- Be prepared to teach a scheduled Emozi lesson during the visit window.
- Share any challenges or successes since the last visit.
- Collaborate with your coach to set 1–2 concrete goals for the next month.

How Feedback Will Be Used:

- To identify common supports needed across classrooms.
- To track fidelity for the evaluation (data are aggregated, not tied to individual teacher names in reports).
